Rogers Townsend & Thomas deploys NetDirector for data automation

Tampa, FL — November 6, 2012 – NetDirector, a leading cloud provider of data exchange services, today announced the addition of the Roger Townsend & Thomas, P.C. (“Rogers Townsend”) to their growing network. Rogers Townsend has deployed a number of NetDirector interfaces with their case management system (CMS) to automate data feeds with their client default servicing platforms and other trading partners.

In order to meet recent demands for client/partner interfaces, Rogers Townsend elected to migrate a number of key interfaces to NetDirector. NetDirector’s centralized Cloud-based approach to data integration allows Rogers Townsend to implement changes quickly and with more trading partners. Rogers Townsend has rolled-out numerous key interfaces via a single internet connection, including selective referrals, various milestone event updates and document download/upload with multiple servicer platforms (i.e.: LPS, VendorScape, Lenstar, etc.). They also use NetDirector for Military Search and Bankruptcy PACER automation.

“It is essential that we have a reliable data exchange service that provides data and document automation with our CMS.” said Reggie Corley, Default Services Department Head at Rogers Townsend. “NetDirector has proven to be a reliable and trusted technology partner. Our firm is seeing many benefits of working with a flexible data exchange service that is able to adapt to industry changes in a timely fashion.”

“Rogers Townsend has quickly become a valued partner by pushing the envelope when it comes to adopting new data and document automation”, said Harry Beisswenger, CEO at NetDirector. “We are very pleased to welcome Rogers Townsend to NetDirector’s family of customers and we look forward to supporting them as they continue to expand their business.”
