## **NetDirector launches e-filing interface with Firm Solutions CourtXpress**

**Tampa, FL — August 27, 2013** – NetDirector, a leading cloud provider of data exchange services, today announced the availability of their e-filing interface with Firm Solutions CourtXpress in the state of Florida. The interface consists of an e-filing request (includes documents) and e-filing response transaction which allows attorney firms to send initial first legal filings through their service of process vendor and all subsequent filings direct to CourtXpress.

The NetDirector-CourtXpress interface is currently live with process servers ProVest ([www.provest.us](http://www.provest.us)) & TSI Legal Services ([www.tsilegal.com](http://www.tsilegal.com)) for complaint, summons and service return filings. Ronald R. Wolfe & Associates ([www.wolflawfl.com](http://www.wolflawfl.com)) is the first attorney firm to automate all subsequent filings via the same interface.

Benefits of utilizing the NetDirector-CourtXpress interface include:

- Advanced technology and workflow engine that can meet/match individual specific county requirements
- Alleviating data entry of first filings which (when done manually) can take firms up to 45 minutes
- A confirmation number, fee elements, and case numbers returned electronically - no re-keying into case management system (CMS)
- Seamless round-trip transactions from your firm to E-portal which reduces data mishaps
- A print screen of confirmation and summary in one single PDF

CourtXpress is a comprehensive solution to electronically filing any type of legal pleading with the Clerk of Courts. Many firms are challenged to meet industry standards for e-filing while simultaneously running their business. Rather than focusing on building an entirely new process, monitoring the ever-evolving county e-filing requirements, firms are able to focus on what they do best. CourtXpress combines industry knowledge with superior document management and automation to create a service that assembles legal pleadings, captures all varying county filing requirements and completes the process of paying all filing fees.

“We are pleased to be able to offer e-filing automation to our attorneys, process servers, and other participants,” said Harry Beisswenger, CEO at NetDirector. “Automating the court filing process offers our clients just another way to streamline their operations. This type of service aligns well with our current document interface portfolio which includes bi-directional processing for all types of mortgage related documents and formats including e-recording.”

### **About Firm Solutions**
