

Description

PACER Basic - The PACER interface consists of a request/response (XML), optional PDF search result page and/or PDF docket(s). This round trip transaction allows NetDirector subscribers to search the national PACER Case Locator site for **new bankruptcy filings** or for updates on **existing cases**. The search result PDF displays any current or prior case filings. Both the search result and the docket PDF's contain active hyperlinks allowing you one click access directly to that case or docket entry on the PACER site. This allows you to choose which documents you wish to download, avoid unnecessary costs and increase productivity by eliminating the need to manually search for cases each time.

PACER Plus - The PACER Plus interface has all the same functions as the PACER Basic, but can complete both **Regional and/or National requests** for bankruptcy filings. Results are real time thereby reducing overall risk during the sale process.

SSN Finder - Our SSN Finder service will automatically recognize the missing SSN in the client's request and will obtain it automatically, perform the search, and return the response. SSN Finder also includes **free bonus** return data: Full Name, DOB, and Phone Number(s).

PACER Combo - All the features of PACER Basic with the added benefit of being able to upload search results directly to Black Knight Process Management.

Key Differentiators

- ◆ **Real time** – stay in compliance by submitting requests during various stages of the foreclosure life cycle and prior to sale
- ◆ Your choice of **national and/or regional** search to ensure all filings have been captured
- ◆ Provides a **PDF search screen with active hyperlinks** to prior case dockets and/or docket entries saving you time and navigation
- ◆ **Docket retrieval** – choose all prior dockets or the most recent
- ◆ **Search Result page** as a PDF with optional SSN redaction
- ◆ Docket order sorting (i.e. most recent docket entries first)
- ◆ PDF result sorting in order from active cases to no search results (PACER Plus ONLY)
- ◆ Append party name on the search results page
- ◆ Internal reconciliation logic to confirm all responses have been returned
- ◆ Indicator for possible case closings to ensure speedy foreclosure recommencement
- ◆ NetDirector can initiate auto request from incoming referral
- ◆ Eliminates manual Web site searches, scanning and printing thereby increasing resource capacity
- ◆ Docket availability prior to working a file thereby improving timelines and servicer scorecards
- ◆ Provides secure links to documents that are accessible at your convenience
- ◆ Automatically directs you to the documents in Pacer after one a login
