

Description

NetExtract is an industry-first technology that provides the next level of automation for any business that wants to reduce labor intensive document to text conversions. This remarkable OCR technology is delivered as a Cloud-based service and requires no hardware purchases, software installations, network setup, or ongoing system upgrades and patches from the customer's perspectives. Current NetDirector clients can leverage their existing connection to ramp onto this service quickly.

NetExtract processes incoming images to extract data from them directly and transfer the information into your database with the highest level of accuracy available on the market today.

NetExtract Features

Medical Descriptions on documents are varied and include some very complex definitions. Most providers have processors spending countless hours keying and proofing medical descriptions into their EHR/EMR system. **NetExtract** can significantly reduce labor costs and provide operational efficiencies by extracting and formatting medical data for auto import into clients systems.

- ◆ Intellispell feature included to increase accuracy
- ◆ Data Response is returned within minutes
- ◆ Spell Check—Intelligently corrects misspelled words and OCR errors with advanced pattern matching and replacement techniques

NetExtract Plus!

- ◆ Same as Basic extraction but with full 100% audit
- ◆ 100% of data extracted and verified from any document
- ◆ Quick turnaround (same day)
- ◆ U.S. based audit resources (same day)

Pricing

- ◆ **NetExtract** cloud-based pricing is based on a per extraction/use model.
