Manley Deas Kochalski selects NetDirector for Centralized Data Exchange

Tampa, FL — May 30, 2012 – NetDirector, a leading cloud provider of data exchange services, today announced the addition of the Manley Deas Kochalski, L.L.C. (“MDK”) to their growing network. MDK has completed the initial phase of their NetDirector interface deployment with their case management system (CMS) to automate data feeds with their client default servicing platforms.

After years of developing and managing their client/partner interfaces internally, MDK decided to outsource some of these interfaces to NetDirector. NetDirector’s centralized Cloud-based approach to data integration allows MDK to implement changes quicker and with more trading partners while lowering their ongoing integration support and maintenance costs. MDK has already rolled-out some key interfaces via a single internet connection, such as document uploads and various milestone event updates with LPS Desktop and VendorScape. Based on the success of the initial implementation, MDK plans to transition more interfaces to NetDirector including Bankruptcy PACER.

“We are very pleased with the quality of NetDirector’s centralized support and innovative technology platform.” said Ed Rudd, vice president of information technology at MDK. “Their data transformation and centralized transaction mapping will allow our firm to automate complex event updates including LPS Desktop forms such as judgment entered, sale results, etc. We see NetDirector as a trusted technology partner that allows us to focus on our core competencies instead of spinning our wheels chasing new interfaces.” Our firm is already seeing the benefits of eliminating duplicate data entry by automating a myriad of client milestone events improving our client scorecards in the process.”

“NetDirector is pleased to offer MDK comprehensive data exchange to automate business processes and increase their capacity”, said Harry Beisswenger, CEO at NetDirector. “The ability for a default servicing firm to effectively manage data and document automation with a large number of clients and partners sets it apart from its competitors. We welcome MDK to NetDirector’s family of business partners, and we look forward to a relationship that will provide long-term results.”

About Manley Deas Kochalski

MDK is a leading default litigation law firm that provides regional representation to its financial institution clients in four key judicial jurisdictions: Ohio, Kentucky, Indiana and Illinois. MDK offers a full complement of services that covers the entire default cycle. This targeted yet comprehensive approach allows clients one relationship that covers a large and important geographic region. Through the use of its proprietary technology platform, MDK combines the legal capacity of a top-rated law firm with the regulatory compliance of a financial institution.
